Re: Amendment to Sludge Management Permit No. 3568008
Tenkiller State Park

Dear Mr. Cobb,

The Oklahoma Department of Environmental Quality, Water Quality Division has received the request to amend existing SMP 3568008 for Tenkiller State Park, approved on October 1, 2001. The biosolids have been removed and land applied in accordance with the sludge management plan. Approval is granted to remove the small amount of biosolids and materials remaining in the lagoon based on the following requirements:

- The biosolids may be temporarily stored on site for no longer than six (6) months.
- The biosolids should be stored in a secure area to insure that no biosolids leave the site. A berm and silt fence should be adequate.
- The biosolids may be incorporated into the soil on site to promote revegetation.
- Biosolids may not be used in the construction of new lagoons.

Any deviation from this amendment requires prior written approval from DEQ. If you have any questions you can contact me at (405) 702-8109.

Sincerely,

A handwritten signature in black ink, appearing to read "Larry Phillips", is written over a horizontal line.

Larry Phillips, Biosolids Coordinator
Municipal Permits
Water Quality Division
